Peter Whish-Wilson MP, Humpbacks & Highrises and more...

Community Group information and Displays
Expert research and the many terminal myths debunked!
Be informed and have your questions answered

Refreshments and Save Our Spit stickers available | Gold coin donation

The Broadwater Marine Project proposal is being promoted by the state government and Gold Coast City Council on the basis that it will generate almost endless jobs and wealth for all, whilst not damaging our sensitive marine park environment, our world class surf break or public access to what is currently our city's Central Park. The reality couldn't be further from this! With the prospect of very limited job opportunities for locals, vast and irreversible environmental damage, our best free and open public space fenced off and privately developed as well as massive ongoing economic burden to rate payers, running at a continual loss! There's **a lot** they're not telling you - this is public owned land, it's your land ... are you going to just give it away to increase the wealth of a private few?
